

RoHS / REACH Compliance

V2. January 2015

Dear Speedboard Customer,

EC Directive 2011/65/EU (the RoHS2 Directive) restricts the use of the hazardous substances listed below in electrical and electronic equipment.

RoHS2 compliance at Speedboard Assembly Services means that:

- Our suppliers are required to comply with RoHS Regulations for materials purchased by us unless specifically noted as being non-RoHS. i.e. the default position is for all parts to be RoHS compliant.
- Customers have adequately specified their assembly / product as being RoHS compliant and have correctly specified all parts within their Bill of Materials as RoHS compliant.
- Our manufacturing process for specified assemblies uses Lead free solder.

Compliance is either because the products do not contain any of the restricted substances referred to in Article 4(1) of the RoHS Directive at the concentrations in excess of those permitted under the RoHS Directive or removal of the restricted substance is not technically possible and their existence in the products at levels in excess of these concentrations is allowed as one of the particular applications listed in the Annex to the RoHS Directive.

For these purposes, the maximum concentration values of the restricted substances by weight in homogenous materials are:

Lead	0.1%
Mercury	0.1%
Hexavalent Chromium	0.1%
Polybrominated Biphenyls	0.1%
Polybrominated Diphenyl Ethers	0.1%
Cadmium	0.01%

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

REACH compliance at Speedboard Assembly Services means that:

- Our suppliers are required to comply with REACH Regulations for materials purchased by us.
- We do not intend to register any substances or mixtures as we do not supply such items; however our suppliers are required to register any substances or mixtures if the article supplied to us meets the conditions met in article 7.1 and 7.5 of the REACH Regulation.
- Our suppliers are required to ensure that all articles supplied to us that contain substances or mixtures held within the candidate list of Substances of Very High Concern (SVHC) are communicated to us as per Article 7.2 of the REACH Regulation.
- Our manufacturing processes do not contain substances of very high concern (SVHC) above the threshold value declared as per the European Chemicals Agency (ECHA).

To the best of our knowledge and based on the information given by our suppliers, Speedboard Assembly Services Ltd do not intentionally supply articles with substances or mixtures above the threshold value listed in the REACH Regulation titled "Candidate List of Substances of Very High Concern".

This determination is based on information from sources which we believe are reliable.

We trust this information meets with your approval.

Yours sincerely,

Neil Owen
Managing Director
