

Test Engineer (Full time)

Advertisement:

Reporting to the Test Supervisor you will be required to test and fault find production PCBAs and finished units down to component level. Test equipment includes ICT, Boundary Scan (JTAG) and customer specific functional test.

The hours are:

Mon - Thu 08:00 to 16:30 with half hour lunch
Fri 08:00 to 13:00 no lunch

The pay is between £24,000 and £29,000 depending on qualifications and experience.

This is a "Full" overtime position. Therefore:

Overtime at x 1.3 (Week days and Sat am), x1.5 (Sat pm) and x2 (Sunday)

Overview:

Production testing at Speedboard is a key part of our manufacturing offering. Testing is very varied due to the range of equipment we build. Engineers need to be suitably qualified and ideally experienced in fault finding.

College graduates must be able to demonstrate relevant work experience or projects that relate to production testing and/or fault finding.

This is a busy department that continues to expand year on year.

Essential to the role is the understanding of analogue, digital and RF testing.

The ideal candidate:

The person most likely to be offered this role will have previous experience / qualifications in:
(in no particular order)

- ONC / HNC in electronics (or equivalent)
- Expertise in the testing of analogue, digital and RF PCBA assemblies
- Proven track record in fault finding to component level
- Be able to demonstrate your attention to detail
- Good computer skills. Excel.
- Good grasp of English Language (GCSE Grade 5/D or equivalent)
- Local to Windsor (easily commutable within 30 mins)
