

Note UK Ltd., is based in Stonehouse, Gloucestershire and carries out the sub-contract manufacture of printed circuit board assemblies for the consumer, industrial and defence sectors.

The company is part of the Note AB Group which is based in Sweden

NOTE UK Ltd are committed to developing the business towards ecological, social and economic sustainability and to this end we have documented, implemented and maintained an Environmental Management System. The tasks are recognised as shared responsibilities within NOTE UK enabling a continuous improvement of our operations.

We, as a company are committed to the following.

- Compliance with all statutory and regulatory requirements related to our activities, products and services and their environmental aspects.
- Identifying quality and environmental objectives by review and audit of our processes.
- Managing energy use responsibly in all areas of the business.
- Continually improving targets and objectives to prevent and reduce pollution, avoid waste at all times and reduce our impact on the environment.
- Working with and encouraging our suppliers and customers to minimise the impact of their activities on the environment and pursue best practice.
- Promoting environmental awareness and responsibility and recognising and encouraging the contribution each employee can make towards improving environmental performance.
- Aiming to continually improve our quality and environmental management processes by setting and reviewing objectives and targets.
- Seeking to reduce the impact of the company's activities on the local environment and be a good neighbour in the community.

- This policy is available to the public and has been communicated to all the employees.

Ecological perspective

NOTE UK will work for long-term, sustainable development by offering manufacturing solutions that takes the environment into consideration during the entire process and prevents unnecessary negative effects. We expect this same commitment from our suppliers and customers so that at every stage, from raw material to final product use, the impact on the environment will be minimized.

Signed 

 Neville Whitham, Managing Director
